Career Objective

I am an adaptable Full-Stack Software Developer experienced in building web and mobile applications, secure APIs, and background services. Proficient across the software stack—combining backend architecture, secure authentication, modern frontends, and database management. Skilled in clean architecture, cloud and DevOps workflows, deployments, and data backups to deliver high-performance systems. Dedicated to writing quality code, continuous learning, and solving complex problems collaborating with teams.

Experiences

Software Engineer (Jul 2025 – Sep 2026) Biometric Team, NAAS Solutions Limited	.NET Developer (May 2025 – Jul 2025) Remote Internship, Itransition Group	Trainee Programmer (Jun 2024 – May 2025) Contractual, Star Computer Systems Limited
--	---	---

Certifications

App Development with Flutter Integrating AI & ML National Academy for Computer Training and Research (2026)	Web Application Development with PHP & Laravel Framework BASIS Institute of Technology & Management (2024)
Cross Platform Apps using ASP.NET, Angular & React IsDB – Bangladesh Islamic Solidarity Educational Wakf (2025)	Web Design & UI/UX – Frontend Development eShikhon IT Training Institute (2023)

Projects

Bio RPT Service Automated .NET service querying Oracle databases to process datasets and generate AES-encrypted CSV reports. EC Login Web Portal Developed a secure ASP.NET EF Core and MVC portal to streamline authentication, authorization, and data access. Dump Data Scheduler Scheduled .NET service that extracts large Oracle datasets, applies AES encryption, and dynamically generates reports.	Airflow DAGs Deployed Apache Airflow DAGs to automate file transfers and scheduled data backups to secure remote SFTP location. QC Web Portal Real-time Angular and ASP.NET Core web portal streamlining quality control, testing, and enhance accuracy. Deregistration Portal Developed an Angular and ASP.NET Core portal to process bulk SIM deactivation via CSV with real-time data validation.
